ABOUT ME

I am a dedicated web developer with a history of creating responsive, user-centric websites that merge creativity and technology. I collaborate with clients to transform visions into impactful solutions, leveraging each project as an opportunity to innovate and deliver meaningful digital experiences.

WORK EXPERIENCE

Web developer

TeamForge Global

2023-present

WEBSITE DESIGN, DEVELOPMENT & MAINTENANCE

- Consult with clients to design and develop responsive websites aligned with business objectives.
- Deliver custom solutions for diverse client needs, balancing creativity and technical precision.
- Coordinate multiple projects simultaneously, maintaining 100% adherence to deadlines and quality standards.
- Implement SEO strategies that increased organic traffic and improved search rankings for primary keywords from page 3 to page 1.
- Create comprehensive plans detailing project scope, timelines, and deliverables, ensuring clients have a clear vision of the process and outcomes.

Web developer

DodoTech

2022-2023

SUMMARY

Delivered innovative and customized web solutions for a Dutch startup by combining technical expertise and creative design, ensuring user-friendly and visually appealing results for diverse client projects.

FRONT-END DEVELOPMENT, WEBSITE DESIGN & DEVELOPMENT

- Developed responsive custom websites using WordPress, leading to a 15% increase in client traffic within 3 months.
- Delivered custom solutions for diverse client needs, balancing creativity and technical precision.
- Created designs in Figma, ensuring alignment with client requirements and brand identity.
- Implemented responsive and interactive front-end designs using frameworks to enhance user experience.
- Utilized Git and other source control tools (Sourcetree) to manage versioning and collaborate efficiently with the team.
- Contributed to the front-end development of a server portal using React.js, with small additional support for backend tasks in C# and .NET Core.
